The City of Norman's mosquito control program was designed to collect data, identify species and control mosquitoes through larvicide application and spraying. Due to high mosquito counts and in keeping with this program, another district in Norman has been identified which warrants spraying this Monday, July 26th. The area to be sprayed is as follows:

Spraying after 10:00 P.M. on Monday, July 26th

Northern boundary: Robinson Street
Southern boundary: Main Street
Eastern boundary: Berry Road
Western boundary: I-35

The Parks and Recreation Department is also looking for three additional mosquito trap sponsors. To qualify as a trap sponsor 1) the mosquito control officer would require access to the resident's back yard Monday through Friday, 2) access to a 110 volt outlet, and 3) a location from which to hang the trap such as a pole or tree.

Residents interested in being a trap sponsor may call Bill Ulch, Superintendent of Parks at 366-5478.
